Jupyter_Notebook

August 1, 2022

Add your code below following the instructions given in the course My Jupyter Notebook on IBM Watson Studio

NATHAN BALLARE LIMA

CEO

Data science has motivated me since the day I met her in my first internship, today at the end of my law school, I am doing my final paper on bankruptcy and machine learning. I want to be able to improve and advance in this area, work with it every day

in the cell below, let's do a simple addition 1+1

```
[2]: 1+1
```

```
[2]: 2
```

#bullet list

Example 1

Example 2

Example 3

#numered list

Example 1

Example 2

Example 3

#blocked quotes > i will become a data scientist in 2022.
